

Is your CPD programme up to Standard?

CUREE's Quality Rating (QR) service can help you find that out

What is QR and why should I use it?

Quality Rating is a way of assessing your current CPD programme against objective standards based on the DfE CPD standard, which gives you a rating:

- from * to ***** for overall quality
- against four 'depth of impact' indicators (aspects of provision)

QR allows you to gain evidence on how effective your CPD programme is and allows you to understand which areas of your programme need improvement.

Four Depth of Impact Indicators

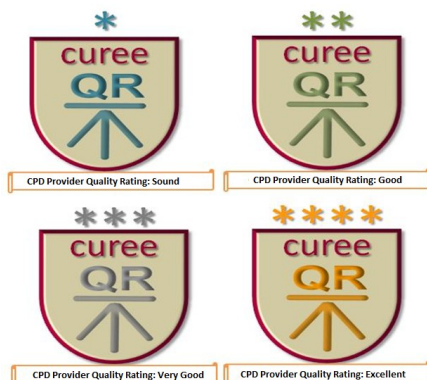

What are the benefits to QR?

- Accreditation from CUREE
- Public recognition on the CUREE website
- Certification for 3 years (renewable)
- Analysis of your programme against the standard
- Acknowledgement of your achievement in a form of a certificate
- Practical recommendations

How does it work?

Your job is to decide what service you want (with the help of CUREE if needed) :

- **Full Provider assessment:** gives you complete picture of you as a CPD provider
- **Programme assessment:** gives you an assessment of your CPD programme
- **Pre-assessment diagnostic:** ideal for bench marking and finding action points

CUREE will:

- **Collect information:** Look at documentation, talk to you, observe at least 1 CPD session and look at participant feedback
- **Collate, analyse and produce:** report, comparisons of your programme with other providers and overall rating
