

Looking to enhance Mentoring, Coaching and/or Professional Learning in your school or with groups of schools?

Look for the first 6 modular, interactive units of a suite of learning resources for CPD facilitators and co-ordinators working with groups of colleagues. The resources centre on animated presentations of a series of common problems and practical tools for resolving them.

The package will enable you to:

- work on real problems in real contexts
- experience personalised, professional learning
- experiment with the practical, easy-to-use tools
- use the resources in large and small group settings

It also provides an effective and efficient alternative to sending staff out of school on training courses.

Contact Zenobia Daar at zenobia.daar@curee.co.uk to enquire about working in partnership with CUREE to tailor the resources to your context or to obtain more information about the off-the-shelf package.

The package will use text, sound and animated video sequences and:

- Printed guides for facilitators
- Presentations
- Handouts and learner texts
- Cards, board bases and other reusable 'game' components
